# CTOs on: Influence, Budget + Being a CTO

CTOs who somewhat or strongly agree with the following statements about being a CTO:

87%

I enjoy being a CTO.

60%

Legacy infrastructure is hampering my institution's ability to be innovative when it comes to technology needs.

90%

Our central IT department has found effective ways to reach out and partner with other areas of the institution.

## Collaboration but untapped potential:

**59%:** CTOs who sit on the president's council at their institution

**53%:** CTOs who say their institution "very much" leverages their knowledge and insights to inform strategic decisions about technology

**33%:** CTOs who say their institution's student success-related IT investments over past decade have been highly effective

# CTOs on: AI

CTOs indicate their level of agreement with the following statements about AI readiness in higher education generally and at their institution:

● Strongly disagree   ● Somewhat disagree   ● Neither agree nor disagree   ● Somewhat agree  
● Strongly agree

Higher education is handling the rise of AI adeptly.

My institution is handling the rise of AI adeptly.

My institution is substantially more reliant on AI than it was a year ago.

Senior leaders at my institution are engaged in discussions around AI and think it's important.

Effective channels exist between IT and academic affairs to communicate and collaborate on AI policy, etc., at my institution.

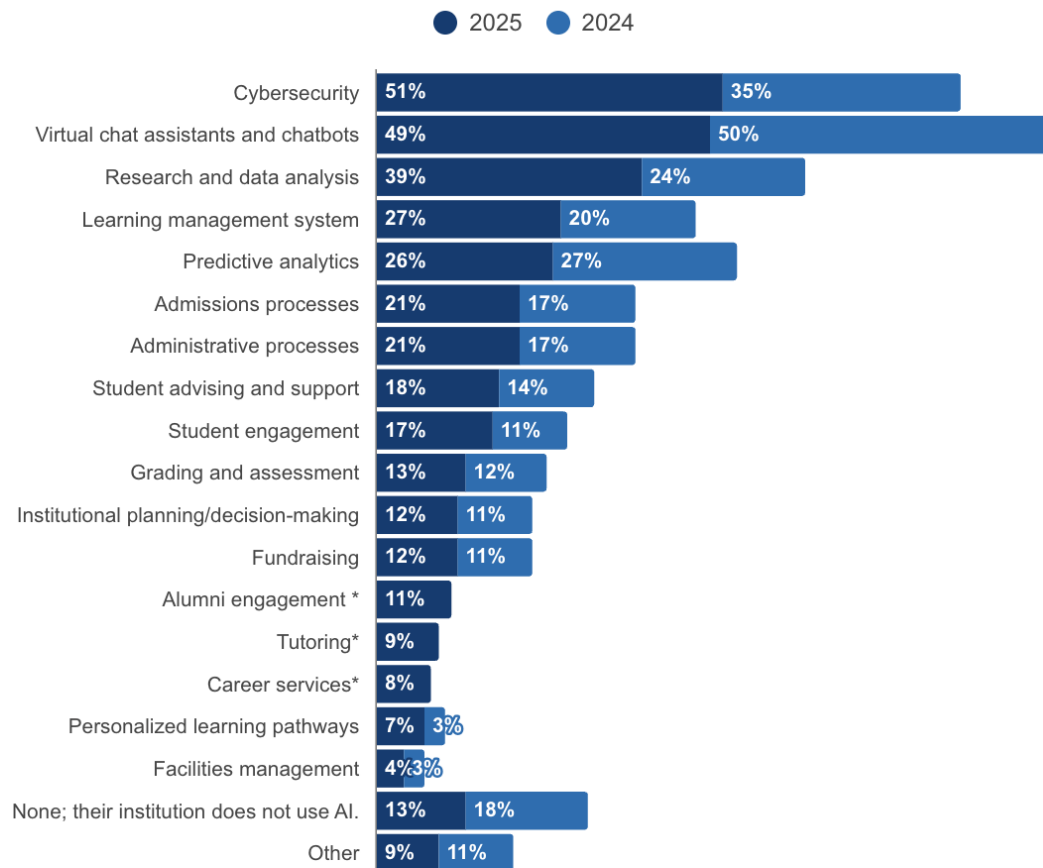

## Despite the AI buzz:

**34%:** CTOs who say investing in generative AI is a high or essential priority for their institution

**54%:** CTOs who say AI's overall impact on higher ed so far is positive or very positive

# CTOs on: AI (cont.)

CTOs who say their institution uses AI in the following areas or ways, with last year's survey results for comparison where possible:

\*New category in 2025; no 2024 comparison available

## Numbers to Know

### 66% vs. 36%

Public versus private nonprofit institution CTOs whose college has partnered or is considering partnering with a technology company to implement AI

### 26%

CTOs (all) whose institution has developed its own AI technology using open source tools or is considering doing so

### 53%

CTOs (all) who somewhat or strongly agree that their institution emphasizes thinking about AI for individual use cases than at enterprise scale

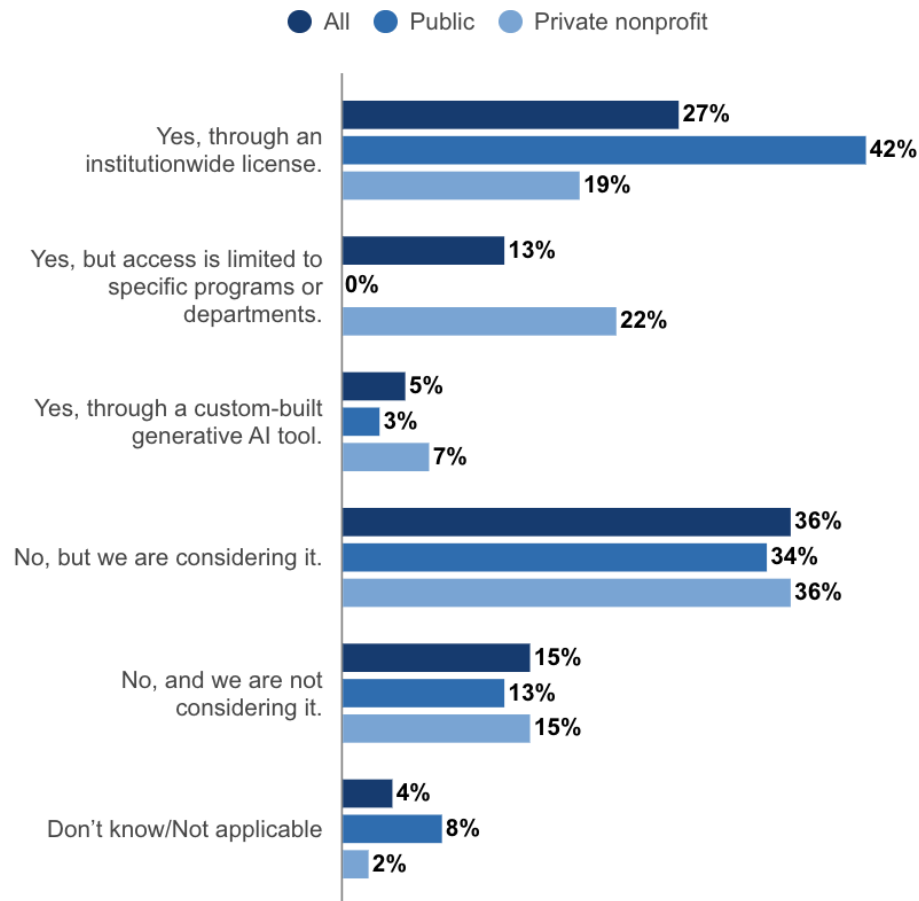

### 11%

CTOs (all) who say their institution has a comprehensive AI strategy

# CTOs on: AI (cont.)

CTOs on whether and how their institution provides students access to generative AI tools, all and by sector, selecting all that apply:

## AI policies and student access vary:

**42% vs. 39%:** CTOs whose institution has adopted formal AI policies/guidelines regarding general use versus instruction

**31%:** CTOs whose institution has not adopted any AI policies/guidelines for use in research, instruction, general use, administrative tasks, etc.

**63% vs. 49%:** CTOs whose institution is not providing student access to generative AI tools who blame associated costs versus those who blame concerns about ethics/potential misuse

# Audience Poll

**Q: How would you “grade” your institution’s overall approach to the rise of generative AI in higher education?**

- A/Excellent: The institution is navigating AI in a way I find thoughtful and appropriate.
- B/Good: The institution is making efforts that mostly align with what I think is needed.
- C/Fair: The approach is mixed or unclear, and more could be done.
- D/Poor: The institution’s actions don’t align with what I think is needed.
- F/Failing: There’s been little to no meaningful response.
- Not sure/I don’t have enough information.

# CTOs on: Sustainability

CTOs who say the following about technology and environmental sustainability at their college or university:

34%

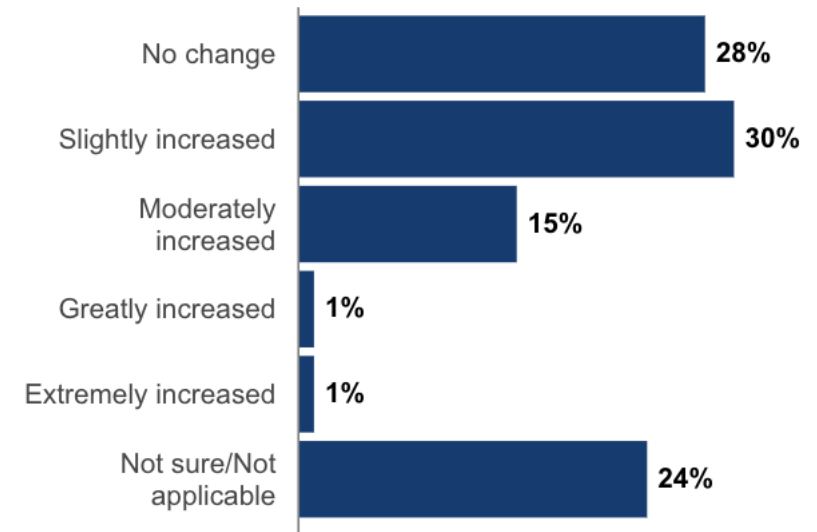

19%

15%

- We have sustainability goals related to technology use.
- Senior leaders consider environmental impact/energy use when making decisions about technology.
- We employ data-informed approaches to reduce/optimize technology-related energy use.

CTOs on how their institution's use of AI has impacted its carbon footprint/electricity use:

# CTOs on: Cybersecurity

CTOs' level of confidence that their institution's practices can prevent cyberattacks that could compromise data or intellectual property or lead to a ransomware event:

## Questioning security:

**90%:** CTOs who say their institution requires multi-factor authentication for all employee accounts

**26%:** CTOs who say their institution requires cybersecurity training of all students

**31%:** CTOs who say their institution requires vendors who provide AI technology and services to have adequate cybersecurity insurance

# CTOs on: Personnel Issues

CTOs indicate their level of agreement with the following statements about recruiting and retaining technology employees at their college or university:

● Strongly disagree   ● Somewhat disagree   ● Neither agree nor disagree  
● Somewhat agree   ● Strongly agree

We are struggling to hire new technology employees.

We are struggling to retain current technology employees.

Recruitment of technology employees is harder now than it was a few years ago.

## Staff recruitment and retention challenges:

**13%:** CTOs struggling with staff recruitment and/or retention who blame increased opportunities elsewhere for employees with AI skills

**84%:** CTOs struggling with staff recruitment and/or retention who blame better salaries and/or benefits at other organizations outside higher ed

# CTOs on: Digital Transformation + Emerging Tech

CTOs on how their institution prioritizes these areas  
in digital transformation efforts:

	Not a priority	Low priority	Medium priority	High priority	Essential
Administrative/business processes	2%	6%	40%	26%	26%
Artificial intelligence	9%	27%	28%	24%	13%
Data/student success	3%	7%	23%	32%	35%
Libraries	12%	35%	38%	9%	5%
Moving to the cloud	7%	12%	33%	27%	21%
Student services	1%	10%	35%	32%	22%
Teaching and learning	2%	8%	32%	33%	26%

## Numbers to Know:

0%

CTOs with institutional transformation goals (n=41) who say their college has made a complete transformation

63%

CTOs with institutional transformation goals (n=41) who say insufficient number of IT personnel is a major hindrance to progress

14%

CTOs whose institution has made meaningful investments in virtual reality/immersive learning

12%

CTOs whose institution has made meaningful investments in quantum computing/high-performance computing

# CTOs on: Digital Learning + Tech Infrastructure

## Numbers to Know

**59%**

CTOs who express some or strong confidence in the quality of their institution's online and/or hybrid course and program offerings

**49%**

CTOs who somewhat or strongly agree that student demand for online and/or hybrid course options has substantially increased since last year at their institution

**59% vs. 29%**

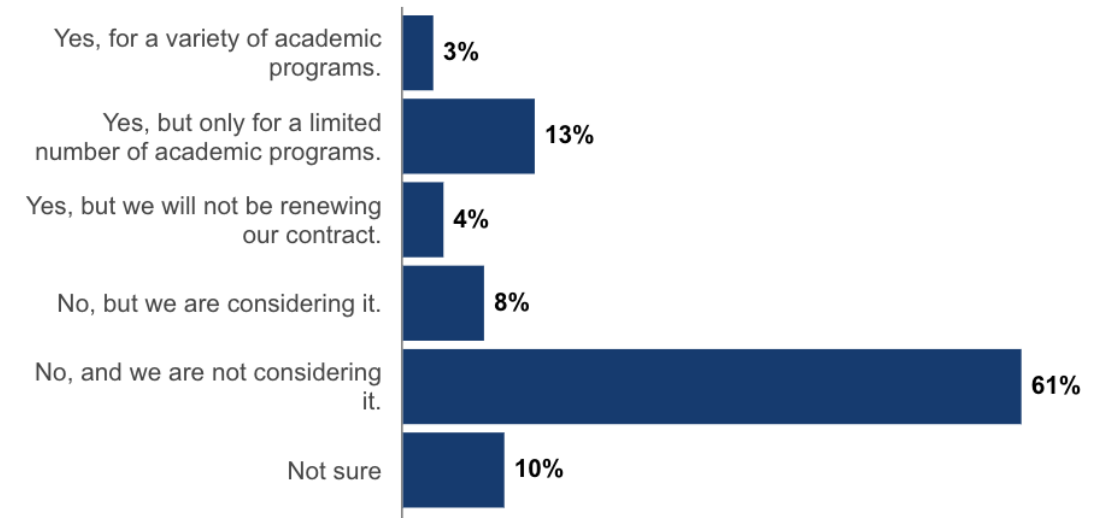

Public versus private nonprofit college CTOs who somewhat or strongly agree their institution has substantially increased online and/or hybrid course options in the last year

**83%**

CTOs who rate the quality of their institution's IT and digital resources to support teaching and learning as good or excellent

## CTOs on whether/how their institution has partnered with an OPM:

# CTOs on: Data + Analytics

CTOs who somewhat or strongly agree with the following statements on data analytics and data readiness. Their institution:

● All ● Public ● Private nonprofit

Actively promotes a culture of data, such as by offering opportunities for faculty, staff and administrators to build data literacy.

Effectively uses data as a means of improving internal processes.

Effectively uses data to inform important decisions.

Effectively uses data to support student success.

Has a data function structure that supports analytics needs.

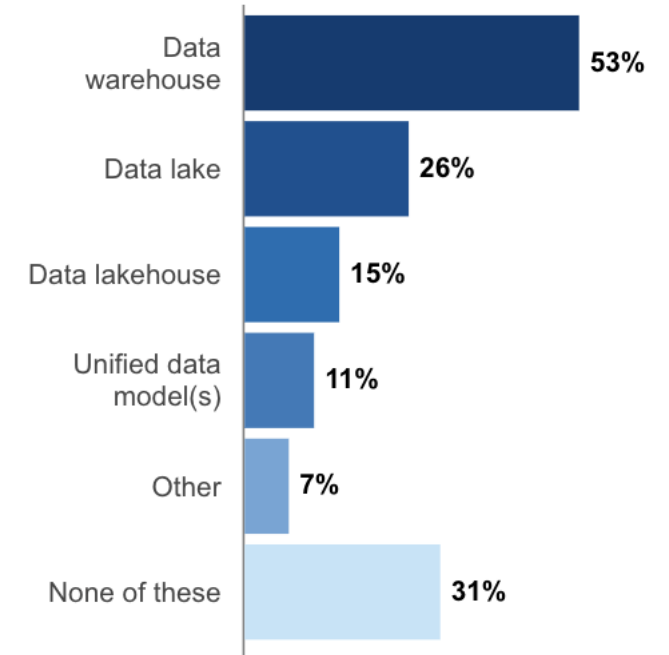

Has the necessary tools for faculty, staff and administrators to access key institutional data.

Makes data analytics a strategic priority.

CTOs who indicate their institution has the following for storage and/or use of institutional data, selecting all that apply:

**“Colleges and universities have to be in control of how AI is being used unless they want the private sector dictating how it will be used at their institutions.”**
