

OPEN DOORS FACT SHEET: CHINA

INSTITUTE OF INTERNATIONAL EDUCATION Educational Exchange Data from *Open Doors 2012*

In the 2011/12 academic year, **194,029** students from China were studying in the United States (up 23% from the previous year). China remains the leading place of origin for students coming to the United States.

Academic Level: While the majority of Chinese students study at the graduate level, the U.S. continues to experience an upsurge in the number of undergraduate students coming from China. In 2011/12, their breakdown was as follows:

38.4%	undergraduate
45.6%	graduate students
6.5%	other
9.5%	OPT (Optional Practical Training)

Historical trends: China sent no students to the U.S. from the 1950s until 1974/75. In the 1980s, numbers of Chinese students grew dramatically, and in 1988/89, China displaced Taiwan as the leading sender remaining the leading place of origin until it was displaced by Japan in 1994/95. In 1998/99, China became the leading sender again for three years, through 2000/01. In 2001/02, India became the top sender of students to the U.S. and retained that position for eight years, through 2008/09. In 2009/10, China again became the top sending country, and retains that place for the third year in a row in 2011/12.

Note: Study abroad figures from *Open Doors* reflect credit given by U.S. campuses during the survey year to their students who studied abroad in the academic year just completed, including the summer term. Study abroad in 2010/11 will be reported in *Open Doors 2012*, once credit is awarded by the home campus. The sharp decline in study abroad during 2002/03 reflects the closing of most programs in China in response to the SARS epidemic. Once programs reopened, the numbers of American students rebounded.
